

Capitalism Is Great

by Kevin McGill, American

Capitalism is great...for cars and computers
make the best product and people shop and choose it.

But health is not a product, insurance—never care.
Profits tell insurance, not the patient, and that's bad!

Capitalism is great, I respect the bottom line
but it's promoting greed, lately almost all the time.

Reaganomics had US believe that capital is god.
Trickle-down was vortex-up, you see, it's not that hard

Capitalism is great—greatly so for the wealthy
when labor has no power, it never ends up healthy

America's first capital: tobacco; cotton land
stolen from the red—and built by the black—man.

Capitalism's great, so great sometimes it hurts us.
Industry, my MTV will misinform the voters.

Capitalism is great, too Titanic to lose it.
Capitalism is great...when we know how to use it
